Welcome to a New Generation
Panda Warmers for Labor & Delivery
Parents dream about the birth of their child.

Today, new parents are well-informed and have high expectations for their birthing experience. They ask lots of questions. They take an active role in the birth experience and look for an environment where bonding and family-centered care are easily facilitated.

Keeping the healthy baby healthy

Nurses balance human touch with medical technology.

Today’s labor and delivery care area has changed for clinicians, too. There’s more patient information available at the point of care to aid decision making. With better equipment, you spend more time interacting with the parents, helping to make the birth a wonderful and miraculous experience.
We want you to notice what we’re missing

The Panda® Warming system from GE is unlike any warmer you have seen... industry leading thermal performance WITHOUT a clumsy overhead heater!

Performing procedures such as X-rays and surgery just got easier. Attending clinicians remain cool and comfortable. Your baby always stays warm, content and safe.
You’ve never seen a warmer like this before

**Warmup with no nuisance alarms**
Turn the Panda Warmer on well in advance of delivery and you know your bed will be warm when the infant arrives. By eliminating nuisance alarms we keep the environment quiet and stress free for caregivers and parents.

**Heat where you need it**
GE’s new Hourglass Heat Profile bathes the baby in soothing warmth, and keeps the caregiver cool and comfortable.

**Integrated resuscitation**
Always available with minimal setup for high risk deliveries. Helps to standardize resuscitation protocols across the perinatal care area.

**Integrated SpO₂**
Monitors SpO₂ and heart rate without additional equipment. Captures data non-invasively. All baby parameters are displayed on the bed’s full-color control panel.

**Integrated scale**
Baby’s first weight is available right at the bedside. So cute parents might even take a picture!

**Exceptional service coverage**
Our team of factory-trained service professionals provides exceptional support from install to clinical and technical education, technical phone support to parts delivery. Also, extended service options are available, which assist in the technical management of your equipment throughout its life.
Simplify care with these advanced features and options

More options
- Multiple drawer packages for optimal storage
- Elevating base
- Integrated X-ray cassette tray
- Drawers
- Multi-year service coverage

The right lights
Light levels are easily controlled to give you the right amount of light when it’s needed. The integrated procedure light is easy-to-position and provides better lighting during procedures. Reduces need for extra external lighting.
Maternal-Infant Care Re-imagined

GE Healthcare’s suite of labor and delivery products has been designed to support your mission of family centered care. With Panda Warmers we have integrated the best technology with superb design. It’s a solution that will help you provide better care in a beautiful environment.

Brilliant full-color controls
Full-color control panel is readily accessible and easy to use. All patient information is vividly displayed on the monitor in real time.

Advanced alarms
Hands-free alarm silence. Simply move your hand in front of the sensor to control the alarm. Helps maintain a clean environment and keep the area quiet and soothing.

Hands-free alarm silence
Caregivers can easily silence alarms by simply waving a hand past the sensor.

Heat where you need it
The Hourglass Heat Profile keeps heat away from the caregiver while providing uniform coverage across the mattress.

Many other accessories are available to customize your Panda. Contact your GE Healthcare Maternal-Infant Care Sales Representative for more information.
